Fax: 918-400-1044

APPLICATION FOR WATER SERVICE AND MEMBERSHIP AGREEMENT

The undersigned, being the owner of land located within the above rule water district, hereby makes application to said district for one water service, and if water services made available by said district, agrees to the following conditions:

1. Purchase or cause to be purchased one membership for water service at the unit price of \$ 2,500.
2. Pay a minimum monthly meter charge for water service from the time services made available by the district, and pay for additional water used at the rate set out in the right schedule. Any changes made in the minimum monthly water charge and the right schedule by the board of directors shall become part of this agreement as though fully set out herein.
3. The district will read the water meters monthly. The service bill for water used shall be rendered by the district on or before the 5th day of the month following the month in which service was provided, and the member agrees to pay said bill on or before the 20th day of the month in which the bill is rendered, or be subject to a late charge of 10%. Failure to pay a bill by the first day of the month following the month in which the bill is rendered shall result in discontinuance of the service.
4. The reconnection charge for restoration of services after each suspension of service because of delinquent payment, or for other infraction of these rules shall be the unpaid amount charged to date against the member's account plus late charges, and a \$50 disconnection fee.
5. It shall be the members responsibility to anticipate change of occupancy and to have his membership transferred to the new owner. Until the membership is formally transferred, the original holder shall be responsible for payment of service. All charges levied against a membership must be paid before the membership can be transferred.
6. The water service supplied by the district shall be for the sole use of the member. The member agrees that he will not extend or permit the extension of pipes for the purpose of transferring water from one property to another, nor will he share or resell water to any other consumer. Each meter service shall supply water to only one residence or business establishment.
7. Meters shall be furnished, installed, owned and kept in proper operating condition by the District. The member shall be responsible for any damage to the meter on account of any cause other than normal wear and tear.
8. The member must have an approved septic system and must provide the water district with easements, to the water district, from the existing water line to the new meter.
9. The member will be responsible for extending the line from the main line to his meter. A water line extended to service more than 1 meter must be engineered and submitted to the Department of Environmental quality for approval. New lines must be inspected by the water district up to the meter. The member must maintain the new line for the first year. After one year the water district maintains the line. Lines past the meter remain the responsibility of the member.
10. The member shall install his own shutoff valve. The valve on the meter is for water district use only.

11. The laws of the state of Oklahoma, the bylaws of the district, and the rules and regulations of the district, as presently existing, and as may be amended from time to time, are made a part of the agreement as though fully set out herein.
